Coink

Product Data Sheet

Coink

LKR-CNK-A

Description

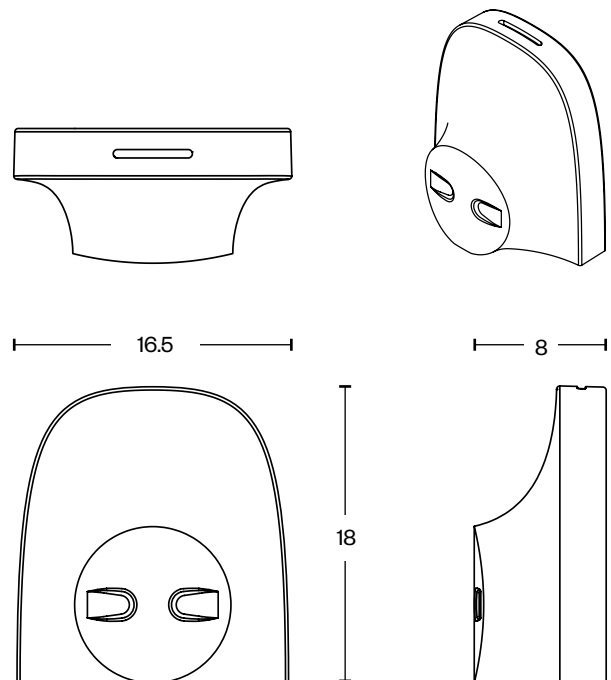

A bookend? Born of an effort to teach a child the value of money and the nostalgia of the objects of our past. Coink evolves from an educational toy to, once heavy with coins, an ornamental book end.

Design : David Caon & Henry Wilson 2021

Dimensions

Width 16.5cm | 6.4"
Depth 8cm | 3.15"
Height 18cm | 7"

Construction

Coink is sand cast in aluminium, seam welded and then double rumbled finished. The aluminium is unsealed.

Imperfections in the surfaces caused by the manufacturing process are to be expected and inherent in the visual language of this object. No two are exactly alike.

Country of Origin

China

Production Lead Time

If not in stock, production lead time is 8 weeks

Care Guide

The aluminium in it's unsealed state is a living material. Coink will oxidise with age and environment, effecting a natural patina. Allow its evolution, or restore the original finish with a polishing solution. We recommend Brasso or Silvo, and a soft polishing cloth.

Materials

Aluminium
Silicon rubber (plug)

Colour and Finish

Raw rumbled aluminium

Raw Aluminium
