Laker is an exploration into functional objects for the home or workplace with design undertaken as a series of discussions about how we live. The A-joint began life as a study of traditional construction methods for utilitarian tables. A gentle evolution over years has seen A-joint develop into a true system incorporating multiple component types to facilitate a range of furniture products.

Sandcast in either Aluminium or Bronze, the joints are coupled with solid timber elements to form tables, stools, benches and workstations. The sturdy and archetypal structures have become keystone pieces for architects and interior designers in both residential and commercial projects.

# A-JOINT TABLES

March 2025

The classic A-Joint Table is a versatile design, instantly suitable for a range of uses, from dining to meetings. Renowned for its simplicity and crafted from beautiful materials, it adapts to various settings, whether minimal and bright or dark and moody.

The A3-Joint's thoughtful design, with three legs emerging from the center, provides exceptional stability and durability, making it ideal for both home and hospitality environments.

The A-Joint Oval Dining Table, inspired by the architecture of smaller homes, offers a refined solution for tighter spaces. Its organic footprint allows for better circulation, making it perfect for entertaining or day-to-day living.

**A-JOINT CUSTOMISATION**  
March 2025

JOINTS

The A-joint system is comprised of 5 individual joints designed to enable the configuration of the various products offered under the A-joint system. These joints and their applications are as follows.

The A-joint system allows for vast customisation of dimension. Laker is able to accommodate almost any table top dimension that may be required. Different joints allow for different sizes. Each joint is offered in either Aluminium or Bronze material.

A-JOINT REGULAR  
LKR-AJR-A/B

DIMENSIONS  
NOTES

MAX 3000L X 1000W  
TABLES AND WORKSTATIONS OF AN AVERAGE SIZE WITH 2 OR MORE SETS OF LEGS

A-JOINT MINI

MAX 1800DIA  
ROUND TABLES

A3-JOINT MINI  
LKR-A3JM-A/B

DIMENSIONS  
NOTES

MAX 900DIA  
STOOLS AND SMALLER ROUND TABLES

HEIGHTS

The A-joint system is able to be specified at bespoke heights upon requests. Heights are limited by the leg-splay. Increasing the finished heights of the table will increase the leg-splay.

LEG SPLAY AT 1050 FINISH HEIGHT

LEG SPLAY AT 740 FINISH HEIGHT

LEG INS

The A-joint Regular, A-joint Mini and A-joint Stretch tables all have a customisable leg inset. This is the distance between the end of the table and the leg assembly. In standard form the distance is 300mm from either side.

LEG INSET SHOWN AT STANDARD 300MM

LEG INSET AT 150MM

MATERIALS

The A-joint system offers a selection of high-quality materials for both tops and frames, including solid timbers and custom options. With various edge finishes and the flexibility to customise materials, the system is designed for versatility and craftsmanship, ensuring a cohesive and durable design for any project.

PRODUCT CLEANING

Products should be dusted regularly using a clean, microfibre cloth. Once dust has been removed, the surface may be cleaned using a clean, damp microfibre cloth. If preferred, a light detergent may be included in the water. Chemical cleaning products, solvents or alcohols are to be avoided as these will penetrate the sealant and dull the surface.

A gentle cleaning motion should be used. Excessive force applied during cleaning may buff and erode the surface negatively, which would then require refinishing to resolve.

Surfaces should then be dried using another clean microfibre cloth. For stubborn stains, the timber may need to be sanded and another coat of sealant applied. This level of maintenance should be carried out by a professional.

PRODUCT WARRANTY

Laker offers a warranty period of 12 months for Commercial Product and 36 months for Residential Product. This warranty is offered from the date of delivery or collection of the product. Laker guarantees to repair or replace any part of the product with a manufacturing or structural defect.

This warranty applies only to the original purchase. An application for a warranty on a product must be made in writing within the warranty period, within 7 days of the defect occurring.

TIMBER CERTIFICATION

Laker assures that wood products are handled and manufactured under strict regulations that support responsible forest management.

The mark of responsible forestry
